

SOCIAL SECTORS

The process of development has, over the years, resulted in a significant reduction in the incidence of absolute poverty. The percentage of population below the poverty line decreased from 51.5 per cent in 1972-73 to 29.9 per cent in 1987-88. The per capita net national product at factor cost (at 1980-81 prices) has increased from Rs.1630 in 1980-81 to Rs.2174 in 1991-92.

Family welfare and health care measures have given positive results. The birth rate declined from 33.7 per thousand in 1980 to 29.3 per thousand in 1991. Over the same period, the death rate declined from 12.6 per thousand to 9.8 per thousand and infant mortality rate from 114 per thousand to 80 per thousand. The population problem, however, continues to be critical since the decline in birth rate has not been good enough to be an effective check on the population growth. Efforts for containment of population growth would need to be particularly intensified in the northern States.

There has been a significant improvement in the literacy rate which increased from 43.6 per cent in 1981 to 52.2 per cent in 1991. The number of primary and upper primary schools has increased from 6.1 lakh in 1981 to 7.1 lakh in 1991. Over the same period, the number of secondary educational institutions has gone up from about 52000 to 79000 and that of degree colleges for general education from 3421 to 4862 respectively. The number of universities has witnessed a considerable increase from 110 to 146 between 1981 and 1991.

A number of programmes are under implementation for the welfare of weaker sections such as Scheduled Castes (SCs), Scheduled Tribes (STs), women and children. The Special Component Plan (SCP) for scheduled castes is under implementation in 21 States and 3 Union Territories (UTs). The Tribal Sub-Plan has been adopted for promotion of developmental activities and protection of interests of scheduled tribes in 18 States and 2 UTs. Integrated Child Development Services (ICDS) cover 2761 blocks benefitting about 150 lakh children and 30 lakh pregnant and nursing mothers in 2.7 lakh villages and urban slums. Under the Support to Training and Employment Programme (STEP), 81000 women have benefitted up to December 1992. In addition, 51.1 per cent of the families assisted under Integrated Rural Development Programme (IRDP) and 56.2 per cent of those who were employed under Jawahar Rozgar Yojana (JRY) in 1991-92 were SC/ST categories.

Housing continues to be a critical problem. The total backlog of housing in 1991 was of the order of 31 million comprising 20.6 million in rural areas and 10.4 million in urban areas. National Housing Bank (NHB) has provided assistance to about one million dwelling units of which 60 per cent were located in rural areas. The re-finance assistance provided by NHB up to November 1992 amounted to Rs.1367.5 crore.

About 78.4 per cent of rural population and 84.9 per cent of urban population was provided with drinking water supply as at the end of March 1992. Sanitation facility was available to 47.9 per cent of population in urban areas and to a mere 2.7 per cent in rural areas during the same period.

The various special employment programmes are mainly to tackle the problem of poverty and unemployment. Under IRDP, 2.5 million families were assisted during 1991-92 and 0.8 million families during the current year (up to end of October 1992). Employment generated under JRY during 1991-92 was 808 million man-days and 320 million man-days during the current year (up to November 1992). Under the scheme of Self Employment for Educated Unemployed Youth (SEUY), 93000 persons were assisted during 1991-92 and the target set for the current year is one lakh. In the context of the on-going process of structural adjustment and economic reforms, these programmes would need to be further strengthened and implemented in a more cost-efficient manner.

Alleviation of poverty continues to be a major concern of development planning. Keeping in view the goal of near-full employment by the turn of the century, in the interim period, the provision of short-term employment for the unemployed and under-employed, particularly among the poor and the vulnerable, is considered necessary. The strategy adopted is to focus not only on the creation of new jobs but also on the augmentation of the existing employment in terms of productivity and incomes through suitable technology, market and institutional interventions. As a result of the development witnessed in the various sectors of the economy during the past years, through planning and related measures, the per capita net national product (NNP) at factor cost (at 1980-81 prices) has increased from Rs.1630 in 1980-81 to Rs.2174 in 1991-92. The extent of incidence of absolute poverty has significantly declined over the years. The decline in the incidence of poverty in urban areas is greater than in rural areas (Table 9.1.)

9.2 The Government has taken several measures for improving the quality of life of the population. The major areas/sectors which contribute to the development of the human resources are family welfare, education, health, development of women and children, welfare of weaker sections of society, housing, water supply and sanitation, labour and labour welfare, special programmes for alleviation of poverty etc. Over the years, there has been a steady improvement in important indicators of development (Table 9.2).

Population & Family Welfare

9.4 The Census of 1991 estimated the population of India at 846.3 million. In the decade of 1981-1991, 163 million persons were added to the population. Population increased at an annual exponential growth rate of 2.1 per cent during the decade which is marginally lower than the 2.2 per cent growth rate in the previous decade of 1971-1981.

9.5 The National Family Planning Programme was launched in 1951 which gradually expanded into a community-oriented service network. Its' progress is outlined in Table 9.4. While the targets set for Seventh Plan in the case of couple protection rate, crude death rate and infant mortality rate have been achieved, that for crude birth rate has not been achieved (Table 9.5.) The cumulative performance since inception of the family planning programme reached about 80.79 million sterilisations and 46.37 million IUD insertions by 31 March 1992. Besides, there were around 14 million conventional contraceptive users and over 3 million oral pill users during 1991-92. It is estimated that out of 148 million couples in the country, 43.5 per cent were effectively protected by various methods of family planning as on 31 March 1992. The Table 9.6 presents targets and achievements for the years 1991-92 and 1992-93 (up to November 1992).

TABLE 9.5
Performance of the Family Welfare Programme

9.6 According to the provisional SRS estimates of Registrar General of India, birth rate and death rate at the national level were 29.3 and 9.8 per thousand respectively for the year 1991. The infant mortality rate for the year 1991 was 80 per thousand live births. However, there are wide inter-State variations as is evident from Table 9.3. In 1981, 90 districts had a crude birth rate of 39 per thousand population and above. Of these, 83 districts were located in the States of Bihar, Madhya Pradesh, Rajasthan and Uttar Pradesh. The main thrust of the intervention strategies has, therefore, to be increasingly focussed on areas in States and districts with poor performance.

9.7 Several interventions have been included under the Child Survival and Safe Motherhood Programme to reduce infant, child and maternal morbidity and mortality rates. Besides reducing the disease burden, and infant and maternal mortality rates, it is essential to create a positive environment for the promotion of a small family norm. The Immunisation Programme achieved high levels of immunization coverage in large parts of the country and control of vaccine preventable diseases has also established an outreach network of services and contacts with communities. Neo-natal tetanus and poliomyelitis have been brought down to negligible levels in large parts of the country. The incidence of poliomyelitis declined from over 28000 reported cases in 1987 to around 8000 cases in 1991; the decline in the incidence was particularly evident in the ten States and Union territories (with a total population of 250 million) which had high levels of immunisation coverage and an efficient surveillance system. In 1991, 1663 cases were reported in these States, a reduction of more than 80 per cent as compared to 8819 cases in 1987. Over two lakh cases of neo-natal tetanus were estimated to have been prevented in 1991 as a result of the immunization programme. The fall in the infant mortality rate from 97 per thousand live births in 1985 to 80 in 1991 is estimated to have led to the saving of about 4 lakh lives in 1991. The access to women and children established under the Immunization Programme is now being utilized to further extend and intensify the reach of other services related to maternal and child health and to accelerate the declining trend of IMR and maternal mortality rates. The package of services for children includes newborn care, immunization services, administration of Vitamin A, pneumonia therapy and appropriate case management of diarrhoeal diseases to prevent deaths. In addition, pregnant women would be provided ante-natal care, TT immunization, anaemia control, screening and referral of high risk cases, promotion of clean and safe delivery practices and birth spacing.

9.8 The containment of population growth is one of the priority objectives of the Eighth Plan. The Plan aims at reducing birth rate from 30.2 per thousand in 1990 (estimated at 29.3 in 1991) to 26 per thousand by 1997. The infant mortality rate (IMR) is also to be brought down from 80 per thousand live births in 1990 (estimated at 80 in 1991) to 70 by 1997. The National Health Policy (1983) aimed at achieving a net reproduction rate of unity (NRR=1) by the turn of the century with a crude birth rate of 21 per 1000 population, crude death rate of 9 per 1000 population and an annual natural growth rate of 1.2 per cent. The Seventh Five Year Plan envisaged the attainment of this goal in the period 2006-2011 AD.

It has now been shifted to the period 2011-2016 AD in the Eighth Plan. Policy interventions should eventually develop into a popular mass movement for achieving optimum results in containing the problem of population growth. Adequate attention has to be paid to female literacy, age at marriage, employment opportunities for women and their status in society. These are as important as achieving a reduction in infant mortality, improving health and nutrition of pre-school children and providing a comprehensive package of maternal health care services.

9.9 In spite of massive efforts, budgetary support and infrastructure development, the performance of the family welfare programme has lagged behind in the northern States of Bihar, Madhya Pradesh, Rajasthan and Uttar Pradesh, which continue to be characterised by high birth and total fertility rates. Efforts for containment of population growth have to be intensified. This calls for an integrated approach and concerted efforts through both Government and non-Government organisations besides social and political commitment to make it a national movement.

Literacy and Education

9.10 Literacy and education play a key role in human resource development. High literacy rate, especially high female literacy rate, is associated with a low rate of population growth, infant mortality, maternal mortality and other important indicators of improvement in quality of life of the population. According to the 1991 census, 52.2 per cent (excluding J&K) of the population aged seven years and above was literate as against 18.3 per cent of total population aged five years and above in 1951. The Eighth Plan has given priority to universalisation of elementary education and complete eradication of illiteracy in the age group of 15 to 35 years. Efforts will be made for diversification through vocational training as well as for modernisation of the content and process of education by way of computer literacy. Considering that technical education including management education is one of the effective means of creating skilled manpower required for developmental tasks, it is important to consolidate and upgrade higher and technical education. For supplementing governmental efforts and facilitating the availability of adequate resources, encouragement will be given to resource mobilisation for education. Other important aspects of the strategy include making adequate provision for freeships and scholarships to poor and meritorious students, particularly those from Scheduled Castes and Tribes and economically weaker sections. The National Policy on Education (NPE) 1986 has been modified in the light of developments since the formulation of the policy. A National Development Council Committee on literacy has been set up in April 1992 in order to give a decisive lead on universal literacy. The growth of recognised educational institutions since 1951 is shown in Table 9.7.

**TABLE 9.7
Growth of Recognised Educational Institutions since 1951**

1	1951 2	1961 3	1971 4	(As on 31 March)

Primary Education

9.11 Emphasis is being given to the universalisation of elementary education (UEE) both through full-time formal schools and part-time non-formal arrangements particularly for working children and girls. Early childhood education would be expanded by attaching pre-primary schools to selected primary schools and through involvement of voluntary agencies. Towards this end, measures such as the provision of primary schools or alternatives such as non-formal education (NFE) centres within walking distance of one kilometre to every child, opening of part-time schools with appropriate adjustments and modifications to cater to the specific requirements of children in hilly, desert, tribal and inaccessible areas are envisaged. The progress of enrolment and teachers in primary and upper primary schools are given in Table 9.8.

TABLE 9.8
Enrolment and Teachers in Primary and Upper Primary Schools

Year	Primary				Upper Primary				(Lakh, as on 31 March)
	Boys	Girls	Total	Teachers	Boys	Girls	Total	Teachers	
1	2	3	4	5	6	7	8	9

9.12 The infrastructure facilities in terms of primary and upper primary schools increased more than threefold between 1951 and 1991. The gross enrolment ratio (GER) in 1990-91 in the primary stage (classes I-V) and upper primary stage(classes VI-VIII) was 101 and 60 per cent respectively. Considering that the number of overage and underage children in the GER data was in the range of 16-23 per cent and the dropout rate in 1987-88 was 47.0 per cent at the primary stage and 62.3 per cent for the elementary stage as a whole, it will be necessary to make concerted efforts for achieving the goal of universal enrolment and retention. The strategies adopted for realising this objective include a phased reduction in the ratio between primary and middle schools from the existing 4:1 to 2:1, adoption of a decentralised approach to curriculum development, quality improvement in the process of teaching and learning, emphasis on child-centred and activity-based approach and reduction of curricular load.

9.13 The scheme of Non-Formal Education (NFE) is a large and systematic programme with focus on children who are unable to attend formal schools for various reasons. The objective of the scheme is to impart education to such children with a view to achieving the goal of universal elementary education. The scheme has its focus on the ten educationally backward States. It was revised in its content and emphasis with a view to extending its coverage to urban slums, hilly, tribal and desert areas and areas with a concentration of working children in the other States. At the end of March 1992, about 68 lakh students were enrolled in 272000 NFE centres, including 81607 centres for girls and 27342 centres being run by 419 voluntary agencies.

9.14 The Scheme of Operation Blackboard (OB) was introduced in 1987-88 to bring about a substantial improvement in facilities in the primary schools in the form of buildings, provision of teachers and teaching and learning materials including blackboards, maps etc, with the aim of improving the quality of education, reducing the dropout rate and improving

the participation of girls and their retention in schools. By the end of September 1992, the scheme covered 421000 primary schools (78 per cent of the total) in 5397 blocks of 32 States and Union Territories and sanctioned 119000 posts of teachers.

Adult Education

9.15 The National Literacy Mission launched in 1988 adopted specific and time-bound approach to achieve total literacy through the involvement of non-Governmental organisations. The Total Literacy Campaign (TLC) has been introduced in 179 selected districts with a special focus on literacy for rural women. About 32000 Jana Shikshan Nilayams (JSNs) were established by 1991-92 through which post literacy programmes were institutionalised. Learning centres in clusters of 30-50 neo-literates are also organised in post-literacy campaigns. A National Institute of Adult Education was set up in January 1991 to augment technical and academic support in research and evaluation studies.

Secondary Education

9.16 The number of educational institutions of the level of higher secondary schools, intermediate and pre-degree junior colleges recorded a significant expansion from 7416 in 1951 to 37051 in 1971 and 78619 in 1991. The progress of enrolment and teachers in secondary schools is given in Table 9.9.

**TABLE 9.9

9.17 The scheme of Vocationalisation of Secondary Education started in 1988 continued to be implemented with vigour keeping in view the priorities accorded to vocationalisation of education. The main objectives of the scheme are to provide diversification of educational opportunities so as to enhance employability, reduce the mismatch between demand and supply of skilled manpower and reduce the number of those pursuing higher education. The selection of vocational courses is made keeping in view the manpower requirements of various trades and skills based on surveys, information available from employment exchanges etc. The scheme lays considerable emphasis on practical training. It is being implemented in 27 States and Union Territories.

9.18 In order to improve the quality of science education and promote scientific aptitude, as envisaged under NPE 1986, a scheme for Improvement of Science Education in Schools was started in 1987-88. The important aspects of the scheme include financial assistance for providing science kits, strengthening of laboratories, upgradation of libraries, setting up of District Resource Centres for science education and training of teachers.

9.19 A scheme of Environmental Orientation to School Education was started in 1988-89 with the objective of promoting integration of educational programmes with local environmental conditions. Under the scheme, 100 per cent financial assistance is provided to States and Union Territories and voluntary agencies for taking up various programmes

and activities aimed at creating environmental awareness among the students. The project activities include adaptation of curriculum to local conditions and preparation of textbooks, instruction material, booklets, brochures, posters, films, audio tapes etc.

9.20 A pilot Project on Computer Literacy and Studies in schools was initiated in 1984-85 with a view to acquainting students and teachers with computer applications. To begin with, 248 selected secondary schools were covered under the project. So far the coverage is 2598 schools falling in all the States/UTs.

Higher Education

9.21 The facilities for higher education and the number of enrolments for the same have shown considerable growth. During 1991-92, two State Universities, namely North Maharashtra University, Jalgaon and Manonmaniam Sundaranar University, Tirunelveli were established raising the total number of universities to 148. In addition, there are 28 institutes deemed to be universities. The Union Government has also established 10 Central Universities. In order to give a thrust to distance education, the Indira Gandhi National Open University established in 1985 provides access to higher education to a large segment of the population, especially from disadvantaged groups.

9.22 Higher education needs to be extended in an equitable and cost effective manner mainly by large scale expansion of distance education system and increased involvement of voluntary and private agencies. The University Grants Commission (UGC) continued its efforts to promote and encourage the concept of autonomy through the scheme of autonomous colleges. Considering the importance given to re-designing of courses for achieving manpower supply demand balances, the UGC had set up 30 Curriculum Development Centres up to December 1991, 11 in sciences, 18 in humanities and social sciences and one in vocational education. The UGC has also continued its assistance to 314 colleges engaged in the implementation of Colleges Science Improvement Programme(COSIP).

Technical Education

9.23 Technical education is a key input for enabling the country to keep abreast of the technological developments taking place else-where in the world, achieve productivity and quality in its pursuit of attaining international competitiveness and world standard of quality in all fields/sectors of activity. The main institutions in the field of technical education are the five Indian Institutes of Technology (IITs) at Delhi, Bombay, Kanpur, Kharagpur and Madras which are imparting training in engineering and applied sciences at graduate and post-graduate levels. The four Indian Institutes of Management (IIMs) at Ahmedabad, Calcutta, Bangalore and Lucknow have established research centres to meet the needs of other non-corporate and under-managed sectors such as agriculture, rural development, energy, health, education, habitat etc. In addition, there are about 200 recognised Technical Education Institutes (TEIs) at the first degree level and more than 560 polytechnics at diploma level with annual intake capacities of 40000 and 80000 students respectively. About 140 institutions provide facilities for post-graduate studies and research in several specialised areas with an annual capacity of 9400 students. The quantitative expansion has been accompanied by a lowering of standards. Besides, there is a structural imbalance of supply and demand in terms of skill requirement of the business sector and the traditional curriculum followed by the educational institutions. These factors give rise to problems of unemployment and under-employment. Other shortcomings include wastage of the order of 30 per cent at the degree level, 35 per cent at the diploma level and 45 per cent at the post-graduate level. The strategy for future expansion has laid emphasis on modernisation and upgradation of infrastructural facilities, industry-institution inter-action of R & D labs, research mobilisation and quality improvement in technical and management education. For revamping the technical education system, a major project estimated to cost Rs.1650 crore is being implemented with World Bank assistance in two overlapping phases. The underlying objective of the project is to enable State Governments to upgrade their

polytechnics, increase their intake capacity, quality and efficiency. The project will cover about 80 per cent of the approved polytechnics in the country.

Development of Youth and Sports

9.24 There are a number of programmes/schemes to channelise the energies of youth into constructive activities like adventure, sports, education, environmental/ecological development, national integration, drug de-addiction, combating of AIDS/HIV, vocational training, youth clubs etc. These programmes /schemes have been revamped to make them more effective and result-oriented according to the given time frame. The coverage includes involvement of 10 lakh students in youth activities through the National Service Scheme (NSS), 10 lakh in National Cadet Corps (NCC) and 24 lakh in Scouts & Guides and non-student youth activities organised by 432 Nehru Yuva Kendras. Under the National Service Scheme (NSS) volunteers are involved in conducting programmes on adult literacy (including total literacy), family welfare, national integration, wasteland development etc. NSS has adopted about 5000 villages for development and community service. National Institute of Youth Development is being set up to co-ordinate and monitor youth programmes and conduct specialised youth training programmes.

9.25 Grants are given to various National Sports Federations (51 in number) for promotion and popularisation of their respective sports disciplines. Various awards have been instituted to honour outstanding sportspersons. During 1991-92, twelve outstanding sportspersons were decorated with Arjun Award. Cash awards amounting to Rs.39.62 lakh were given to 49 medal winners in international competitions. Another 3640 sports persons were covered under different scholarship schemes for promotion of sports. To meet the standards of international competition, efforts are being made to create Olympic standard swimming pools, multipurpose indoor halls and artificial playing surfaces. During 1992-93, sportspersons continued to be covered under different scholarship schemes for promotion of sports. Cooperation of the Indian Army has been obtained in raising 13 companies of 484 boys under the Scheme of Boys' Sports Companies. Sports Authority of India (SAI) is running 31 Sports Project Development Area (SPDA) centres for 668 trainees and 17 sports hostels for 681 inmates. A total of about 1200 National Sports Talent Contest (NSTC) trainees received specialised coaching in 56 SAI adopted sports schools.

Cultural Development

9.26 An approach paper on national policy on culture has been prepared. During the Eighth Plan, the thrust areas envisaged are conservation and preservation of cultural heritage and promotion of tribal folk culture. The various measures envisaged for realising these objectives include preservation, documentation, expression and dissemination of our ancient civilisation by upgrading/strengthening the existing facilities and encouraging voluntary, community and organised/corporate private efforts. During 1991-92, cultural exchange programmes were signed with nine countries and the Festival of India was organised in Germany consisting of exhibitions, seminars, performing arts and a film festival. 490 monuments were taken-up by the Archaeological Survey of India for major structural conservation during 1991-92. The Programme of Action (1992) under NPE has inter alia emphasized promotion of the concept of cultural neighbourhood, development of child's personality and interlinking of education and culture right from pre-primary stage to highest level of formal education. The National Museum Institute of History of Art Conservation and Museology has introduced courses like M.A. History of Art, Conservation and Museology, Ph.D. in History of Art and courses on Art Appreciation. The Anthropological Survey of India has prepared reports on nearly 4500 communities and brought out their introductory volume delineating the basic concepts of the project.

Health

9.27 Health and population control are among the priority objectives of the Eighth Plan. The Eighth Plan envisages that the health facilities should reach the entire population by the end of Eighth Plan. Within the Health for All (HFA) strategy, health for the underprivileged will be promoted consciously and consistently mainly through emphasising community-based systems reflected in planning of infrastructure with about 30000 population as the basic unit for primary health care.

Health and Medical Infrastructure

9.28 There has been considerable expansion of institutional facilities for treatment of sick and health care (Table 9.10). The doctor-nurse ratio works out to be 1:0.67 in 1991 against the ideal ratio considered to be 1:3. The number of registered medical practitioners per 10000 population was 1.7 in 1951; it increased to 4.7 in 1991. Hospital beds of all categories were 3.2 per 10000 population in 1951 and increased to 9.6 in 1991. There has been a considerable increase in the number of primary health centres and sub-centres. However, there is a shortage of nurses, pharmacists, laboratory technicians, radiographers and dental surgeons in addition to a shortage of buildings.

Primary Health Care

9.29 Primary health care has been accepted as the main instrument for achieving the target of Health for All by 2000 A.D. Accordingly, a three-tier system comprising of community health centres (CHCs), primary health centres (PHCs) and sub-centres has been established. These institutions are providing an integrated primary health care and family welfare service to people at their doorstep. There were about 2067 CHCs, 22495 PHCs and 130474 sub-centres at the end of June 1992. The target of setting up of one sub-centre for every 5000 people in ordinary areas and for 3000 in hilly and tribal areas and one PHC for population of 30000 in general and 20000 for hilly and tribal areas have almost been achieved. However, 58.6 per cent of sub-centres, 42.6 per cent of PHCs and 39.4 per cent of CHCs as in June 1992 did not have buildings of their own. The lack of buildings, shortage of manpower and inadequate provision of drugs, equipment etc. constituted major impediments to full utilisation of these units.

Control of Communicable Diseases

9.30 Acquired Immuno-Deficiency Syndrome (AIDS) has emerged as a new public health problem in the country. The AIDS Control Programme was launched in 1986 as a Central Sector Scheme. Establishment of surveillance centres, testing of cases for infection, training of personnel and mass health education formed the main activities of the programme. But the incidence of the disease has shown an increase from 137 seropositives among 41000 tested up to May 1987 to 11071 seropositives among 15.55 lakh persons tested up to November 1992. The measures undertaken include establishment of 62 surveillance centres in 35 cities for tracking the spread of infection amongst group practising high risk behaviour, ensuring blood safety by surveillance and undertaking a phased programme of development of blood banks, establishment of 118 zonal blood testing facilities for testing HIV infected blood collected at the blood banks, strengthening of 13 regional hospitals for management of HIV infected persons and AIDS cases and health education. Inadequate surveillance system, absence of facilities for examination of blood and blood products and growing menace of intravenous drug abuse contributed to an upsurge in infection. A new centrally sponsored scheme, viz. National AIDS Control Programme, is being launched during the Eighth Plan with assistance from International Development Agencies.

9.31 Leprosy continues to be a major health and social problem. About 2 million persons are estimated to be suffering from this disease at the end of March 1992 as against 4 million in 1981. A National Leprosy Eradication Programme was re-launched in 1982. It is proposed to arrest the disease in all known leprosy areas by 2000 A.D. The introduction of Multi-Drug Therapy (MDT) has shown encouraging results. For containing the transmission of the disease, the strategy adopted is the introduction of MDT in the districts in a phased manner. All 201 endemic and 41 low endemic districts have been covered under MDT.

9.32 The incidence of malaria has come down from about 6.47 million cases in 1976 to 2.11 million cases in 1991, i.e. a reduction of 67.4 per cent. This is the result of several measures taken like the implementation of the Modified Plan of Operation from 1976 onwards under the National Malaria Eradication Programme (NMEP). The Annual Parasite Index (API) has come down from 11.24 per cent in 1976 to 2.57 per cent in 1990. The problem of drug resistance in several States is a cause for concern. Irrigation projects without management of water resources, floating labour population in the cities and major project sites contribute to the increase in incidence of malaria. Appropriate measures to tackle these problems have already been initiated.

9.33 Kala-azar and Japanese Encephalitis (JE) have emerged as major public health problems in recent years. It is highly endemic in about 30 districts in Bihar and 9 districts in West Bengal covering a population of about 75 million. Since 1990-91, separate funds are provided for control of the disease. The indigenously produced vaccine for JE has proved to be effective, safe and required standard. The reported cases and deaths due to JE in the affected States of Andhra Pradesh, West Bengal, U.P., Tamil Nadu and Assam have shown a considerable decline.

9.34 Tuberculosis is another major public health problem in India. About 1.5 per cent of the total population is estimated to be suffering from tuberculosis of the lungs. Under National Tuberculosis Control Programme, 390 districts out of 440 districts as in December 1992 have been provided with District T.B. Centres equipped with equipments and trained staff for undertaking districtwise T.B. Programme in association with general health and medical institutions. In addition, there are about 330 T.B. clinics mostly located in big towns and cities for catering to the needs of the local population. More than 16 lakh new cases are tested and treated each year. About 47000 beds are available for treatment of seriously sick patients. Short-course treatment through chemotherapy drug regimens have been introduced in 235 districts to reduce the duration of treatment.

Development of Women and Children

9.35 The National Policy for Children was adopted in 1974. Subsequently, a programme of Integrated Child Development Services (ICDS) was initiated in 1975 covering 33 blocks for providing an integrated package of services for children in the age group of 0-6 years and expectant and nursing mothers. The package of services includes pre-school education, supplementary feeding, health check-up, immunisation and health/nutrition education. This programme has since had a dramatic spread; it now covers 2761 blocks benefitting about 150 lakh children and 30 lakh pregnant and lactating mothers in 2.7 lakh villages and urban slums. During 1992-93, 300 additional ICDS projects are being sanctioned. External agencies like UNICEF, the Norwegian Agency for Development (NORAD), the Swedish International Development Agency (SIDA), World Food Programme (WFP), Cooperative for American Relief Everywhere (CARE), World Bank, etc. are providing assistance to some aspects of the ICDS programme. Other important programmes for the welfare of women and children are Development of Women and Children in Rural Areas (DWCRA), Early Childhood Education (ECE) for imparting pre-school education to children in the age group of 3-6 years, Special Nutrition Programme (SNP) to provide supplementary nutrition to children below 6 years of age and expectant/nursing mothers living in urban slums, tribal areas and backward rural areas, Balwadi Nutrition Programme (BNP) for providing supplementary nutrition to children in the age group 3-5 years etc. Besides, creche services have been provided through 12470 creches units to about 3 lakh children during 1991-92 and 1992-93. During 1991-92 and 1992-93, 4365 ECE centres continued to be in operation and it is estimated that about 1.5 lakh children have been imparted pre-school education under this programme. For the development of adolescent girls, two schemes in 507 ICDS blocks have been introduced for providing nutrition and health coverage, functional literacy and vocational training in traditional skills etc..

9.36 Several measures have been taken for the development of women. Under the Support to Training and Employment Programme (STEP), 81000 women have benefitted up to December 1992. Fortyfour organisations have been assisted to benefit about 1140 women under the programme of setting up of Employment Training and Production Units funded by Norwegian Agency for Development during the same period. So far 743 courses have been sanctioned to benefit about 18575 women under condensed courses of Education and Vocational Training. Other related support programmes include provision of hostel accommodation for working women, short stay homes, etc. Under the rural poverty alleviation programme of IRDP, 40 per cent of coverage is earmarked for women. Similarly under JRY, 30 per cent of employment generation is targeted for women. As a special concession and encouragement for working women, in the budget for 1992-93, standard deduction for income tax has been increased from Rs. 12000 to Rs.15000 for working women having total income up to Rs.75000 per annum. A National Commission for Women was set up in January 1992 to meet the challenges of fighting the socio-economic injustices and atrocities inflicted on women. The Commission would review the existing laws which affect women, liaise with concerned Ministries, State Governments and non-Government organisations and provide a window for redressal of grievances and complaints of women.

Welfare of Weaker Sections

Scheduled Castes

9.37 The development of Scheduled Castes is being pursued through protective and developmental measures and positive discrimination in their favour in education, employment and other facilities etc. The Special Component Plan (SCP) for scheduled castes is at present in operation in 21 States and 3 UTs. The SCPs of the States are supplemented with special central assistance with a view to creating a multiplier effect and

facilitating adequate flow of resources. There are 21 State Scheduled Caste Development Corporations which extend assistance to Scheduled Caste entrepreneurs to procure loans from financial institutions for taking up bankable projects. There are several central and centrally sponsored schemes such as IRDP, TRYSEM, JRY and NRY for the benefit of vulnerable sections of the population including the SCs. The target for coverage of SC & ST families under IRDP is 50% from 1990-91. Against this, the actual coverage was 51.1 per cent; 36.1 per cent for SCs and 15 per cent STs during 1991-92. Similarly under JRY, 56.2 per cent of employment generation during 1991-92 was from SC and ST beneficiaries. Under Indira Awaas Yojana (IAY), a sub-scheme of JRY, houses free of cost are constructed for SCs/STs and freed bonded labourers. During 1991-92, about 2.08 lakh houses were built under IAY. Under another sub-scheme of JRY, viz the Million Wells Scheme (MWS), free boring of irrigation wells is done for small & marginal farmers belonging to SCs/STs and freed bonded labourers. During 1991-92, about 1.69 lakh wells were constructed under the scheme. A central sector scheme for special educational development of SC girls of low literacy level has been included in 1992-93 Plan. One of the important objectives of the Eighth Plan is elimination of scavenging and rehabilitation of scavengers. In 1991-92, a National Scheme of Liberation and Rehabilitation of Scavengers has been launched.

Scheduled Tribes

9.38 The Tribal Sub-Plan (TSP) strategy has been adopted since 1974-75 for promotion of developmental activities among Scheduled Tribes and protection of their interest. This is in operation in 18 States and 2 UTs and is being implemented through 193 Integrated Tribal Development Projects (ITDPs) covering 311.97 lakh tribal population, 249 pockets of tribal concentration having coverage of 39.95 lakh tribal population, 77 clusters and 74 primitive tribal group projects. Funds for the TSP are made available from State Plans, Special Central Assistance, Sectoral Programme of Central Ministries/Departments and financial institutions. There are several central and centrally sponsored schemes for economic and educational development of STs. For promotion of education among tribal women and employment opportunities in tribal areas, two central sector schemes with focus on their education and employability through vocational training in tribal areas have been included in 1992-93. A Tribal Cooperative Marketing Development Federation (TRIFED), set up in 1987, has expanded its activities for facilitating marketing of tribal produce, especially minor forest produce. During 1991-92, 9.15 lakh ST families were economically assisted as against the target of 8.00 lakh. The target for 1992-93 is to assist 8.96 lakh families and 2.4 lakh families have been assisted up to September 1992. Under the major poverty alleviation programme of IRDP, 3.81 lakh families i.e. 15 per cent of total families assisted during 1991-92 were STs. Under JRY, 1501.74 lakh of man-days of employment generation i.e. 18.6 per cent of total employment generation during 1991-92 was for ST beneficiaries.

9.39 A National Scheduled Castes and Scheduled Tribes Finance and Development Corporation (NSFDC) was set up in February 1989 to serve as a national institution for taking up and financing viable schemes for economic development of SCs/STs. Its role is to support the activities of State SC and ST Development Corporations. Till May 1992, it had sanctioned 208 income generating projects/schemes which are likely to benefit about 1.3 lakh SCs and STs beneficiaries.

Handicapped/Disabled Persons

9.40 According to a sample survey conducted by National Sample Survey Organisation in 1981, about 120 lakh persons suffered from locomotor, speech, hearing and visual disabilities. Studies undertaken by research organisations indicate that about 2 to 2.5 per cent of the population is estimated to be suffering from mental retardation. Welfare and development of the handicapped persons is an important aspect of social welfare. The Central Government has reserved for the handicapped persons 3 per cent of the vacancies in

the Central Government and Central Public Sector Undertakings in group C and D categories out of which one per cent each is reserved for visually, audially and orthopaedically handicapped persons respectively. In the budget of 1992-93, the deduction for assessment of tax has been increased from Rs.6000 to Rs.12000 per year to reduce the burden of those maintaining handicapped dependents. Various measures like supplying suitable aids and appliances are taken to make handicapped persons functional and self-dependent. Scholarships and financial assistance are also given for their education and vocational training with a view to facilitating their socio-economic rehabilitation. Currently, eleven District Rehabilitation Centres (DRCs) are functioning in the country. Four Regional Rehabilitation Training Centres (RRTCs) at Bombay, Madras, Lucknow and Cuttack are engaged in developing training material, preparing manuals for field use, material for creating community awareness and providing technical support to the DRCs. There are seventeen Vocational Rehabilitation Centres for Handicapped (VRCs), one of them exclusively for women, to evaluate the handicapped and provide adjustment training to facilitate their early rehabilitation. Skill training workshops (STWs) attached to seven of the VRCs also provide non-formal job oriented training to the handicapped. Rehabilitation services are extended to rural areas through mobile camps and 11 Rural Rehabilitation Extension Centres (RRECs) set up in 11 blocks under five of the VRCs. Under poverty alleviation programme of IRDP, 3 per cent of the target for assistance is reserved for physically handicapped persons. During 1991-92, about 13000, i.e. 0.5 per cent of total families assisted, were handicapped persons.

Drug Abuse

9.41 Drug abuse is increasing at an alarming rate affecting all sections of the population. In order to combat the drug abuse menace, various measures are taken with the help of voluntary organisations. To deal with this problem, the Government has adopted a community-based approach under which voluntary organisations are funded to the extent of 90 per cent as per approved norms for providing counselling, de-addiction and after-care facilities to the addict and also for building awareness and educating the people in general about the ill-effects of drug abuse. As on March 1992, 146 counselling centres, 72 de-addiction centres and 11 aftercare centres were functioning in the voluntary sector.

Backward Classes

9.42 In order to provide an additional channel of finance for economic development of the socially and educationally backward classes (SEBCs), Government has set up a National Backward classes Finance and Development Corporation (NBFDC) with an authorised capital of Rs.200 crore in January 1992. The objectives of the Corporation include promotion of self- employment and other ventures, extension of loans for pursuing general/professional/technical education or training at graduate and higher levels, and upgradation of technical and entrepreneurial skills of people belonging to Backward Classes. The Corporation will work as an apex institution for coordination and monitoring the work of Corporations/Banks set up by the State Governments and UT Administrations for the welfare of backward classes.

Housing

9.43 According to the estimates of National Building Organisation (NBO) the housing stock in 1991 was 92.9 million in rural areas and 36.7 million in urban areas. The total backlog of housing is estimated to be 31 million comprising 20.6 million in rural areas and 10.4 million in urban areas. It is estimated that about 48.8 million persons were living in slums in 1990. The service deficiency in term of access to proper sanitation and safe water within reasonable distance is equally alarming. Land, provision of basic services, finance, availability of adequate building materials, low cost technology and trained construction workers are critical inputs for housing. Several constraints are encountered in each of these critical areas. Housing has been primarily self-help activity for the majority of the households. The role of the Government would include creating an enabling environment

and removing constraints in housing activity among various sections of the society, promoting the supply of housing and related services and supporting the extension of appropriate technology and materials and upgradation of the housing stock.

9.44 The National Housing Policy (NHP) was prepared and placed before both houses of Parliament in 1992. The main elements of the Housing Policy include evolution of suitable housing norms with due regard to location, life style of the people etc. for promoting cost-effective standardised housing designs, supply and management of land, expansion of infrastructural facilities like public transport, potable water supply and sanitation as well as housing finance facilities, stimulating production and availability of building materials like cement, steel, bricks, etc. incorporating low-cost technology and materials in the standards and specifications wherever the scope exists and special programmes for disadvantaged sections especially SCs/STs and women in disadvantaged circumstances.

BOX 9.1
National Housing Policy: Objectives

- To assist all people in securing affordable shelter, in particular the houseless, inadequately housed and vulnerable sections.
- To create an enabling environment for housing activity.
- To expand provision of infrastructure facilities.
- To improve the housing of the poorest by direct initiative and financial support.
- To help mobilise resources and facilitate expansion of investment in housing.
- To promote vernacular architecture and preserve the nation's rich heritage in the field of housing settlements.

9.45 A package of excise concessions was provided in the budget for 1992-93 for boosting housing activity. These include full exemption from excise duty on bricks and tiles having a minimum content of 25 per cent of red mud, lightweight concrete building blocks, doors and windows made of plastic, iron and steel and panel doors. A reduction in excise duty from 15 per cent to 5 per cent has also been given on pre-fabricated buildings. Housing has also been dovetailed with other Central and Centrally Sponsored Schemes. Under Jawahar Rozgar Yojana, 6 per cent of the resources are earmarked for Indira Awaas Yojana (IAY). IAY aims at construction of dwelling units for the poorest belonging to SCs/STs and freed bonded labourers in rural areas. Under IAY, houses are to be built in clusters as far as possible as per micro-habitat approach so as to achieve economy in the provision of common facilities. During 1991-92 about 2.07 lakh houses were built under Indira Awaas Yojana.

9.46 The Scheme of Environmental Improvement of Urban Slums (EIUS) forms a part of the Minimum Needs Programme as well as the 20-Point Programme. It aims at ameliorating the living conditions of urban slum dwellers by provision of basic amenities. During 1991-92, 16.21 lakh slum dwellers were covered under the scheme as against the target of 12.96 lakh. The Urban Basic Services for the Poor (UBSP) seeks to integrate the provisions of social services under UBSP and that of physical amenities envisaged under the scheme of EIUS in the State sector. Under NRY, the scheme for Housing and Shelter upgradation (SHASU) seeks to provide assistance for housing and shelter upgradation to

the urban poor in settlements having a population between one lakh and 20 lakh with a relaxation in the lower population limit of one lakh in the case of certain specified areas.

National Housing Bank

9.47 The National Housing Bank (NHB) was established in July 1988 to promote a healthy housing finance system by setting up housing finance institutions both at local and regional levels for providing adequate finance to the housing sector. It is a wholly owned subsidiary of the Reserve Bank of India (RBI) with paid-up capital of Rs.250 crore. The resources of the National Housing Bank have been augmented by RBI's National Housing Credit (LTO) fund, issue of 11.5-12 per cent 20-year Government guaranteed bonds, the LIC and UTI. Besides raising Rs.185.6 crore through its Home Loan Account Scheme from 6.17 lakh account holders up to September 1992, NHB also collected about Rs.155 crore up to the end of June 1992 from 9 per cent capital gains bonds (the scheme was discontinued on September 30, 1992) and 40 per cent of Rs.152.1 crore mobilised by NHB under Voluntary Deposit Scheme from October 1 1991 to January 31 1992 was transferred to NHB's Special Fund. Total external borrowings of NHB under the USAID Government Housing Guarantee Programme and the Housing Programme of Overseas Economic Cooperation Fund of Japan amount to Rs.90.84 crore.

9.48 The NHB is providing assistance for housing through a number of schemes. These include, Home Loan Account Scheme, refinance for direct loans for housing given by scheduled banks (commercial and cooperative) and non-banking institutions (housing finance companies and apex cooperative housing finance societies) and refinance for Land Development and Shelter Projects (LDSP). Till the end of September 1992, the NHB recognised 18 housing finance companies in public and private sectors (including HUDCO) having a network of 246 branches as eligible to draw refinance from it. The NHB has cleared equity participation in four building material projects. This will go a long way in promoting the use of alternative building materials produced from agricultural and industrial wastes. The cumulative refinance assistance provided by NHB to eligible primary lenders by way of housing loans for acquisition or construction of new dwelling units including upgradation of existing units for land development and shelter projects amounted to Rs.1367.50 crore till the end of November 1992. About one million dwelling units, of which 60 per cent were located in rural areas, have been provided assistance by NHB. Till November 1992 NHB has approved 102 detailed project reports involving a total outlay of Rs.669.41 crore for development of 22310 plots and construction of 73532 dwelling units.

National Cooperative Housing Federation (NCHF)

9.49 The NCHF, set up in 1969, is a national level organisation spearheading the entire cooperative housing movement in India. Its aims are to coordinate the Apex Cooperative Housing Finance Societies and to promote and develop cooperative housing societies in the country. Out of 25 State level Apex Societies/Federations as on March 1991, 23 have become members of the NCHF. The State level Apex Societies have advanced loans of Rs.2154.29 crore to the Primary Cooperatives for the construction of about 12.21 lakh houses up to the year ending March 31 1991. The State level Apex Societies are entitled to get refinance from NHB and loans from HUDCO for enlarged operations. About 60 per cent of the house finance disbursed by Apex co-operative has gone to Economically Weaker Sections (EWSs) and Low Income Groups (LIGs). Central and State Governments give preference in land allotment to cooperatives.

Housing and Urban Development Corporation (HUDCO)

9.50 Since 1970, the HUDCO is playing an important role for meeting the housing needs of the poorer sections and vulnerable groups through various States and local agencies. HUDCO finance is available to institutions like State Housing Boards, Developmental Authorities, Improvement Trusts, Cooperative Societies etc. It is earmarking 55 per cent of its sanctions for housing projects for the benefit of Economically

Weaker Sections (EWSs) and Low-Income Groups (LIGs). Fifteen per cent of its resources are reserved for rural (EWS) housing schemes. Up to end of September 1992, it has financed over 52 lakh dwelling units including 23.86 lakh units in rural areas. HUDCO plans to expand its lending for various forms of housing activities and infrastructure during the Eighth Plan. It is also operating a network of building centres for extension of appropriate housing technology and skills promotion.

Water Supply and Sanitation

9.51 Provision of safe drinking water to all, especially the underserved villages, is considered to be crucial for the health and better quality of life of our population. The drinking water supply and sanitation schemes are implemented under the State Sector Minimum Needs Programme as well as under centrally sponsored schemes. It had been envisaged during the Seventh Plan that all the 161722 identified problem villages would be covered with the facility of safe drinking water. However, by the end of the Seventh Plan, 153357 villages could be provided with at least one source of drinking water supply, leaving a balance of 8365 hard core, no-source problem villages. Out of these, 3032 villages were covered during 1990-91. A special allocation of Rs 250 crore was approved during the year 1991-92 for coverage of the residual 5333 no-source villages by 31 March 1993. Out of these, 2365 villages were covered during 1991-92 and the remaining 2968 are targeted to be covered during 1992-93. Out of this, 708 problem villages have been covered up to October 1992. Besides, about 1.5 lakh partially covered villages and habitations also require augmentation for achieving full coverage during the Eighth Plan. However, as per latest information about 500 no-source villages are likely to spill over for coverage during 1993-94. A survey is in progress to ascertain the actual number of partially covered villages. It is also expected that a sizeable number of new no-source villages are likely to emerge due to recurring droughts and depletion of water table. The achievements in the Sixth and Seventh Plans are shown in Table 9.11.

TABLE 9.11
Population with Drinking Water and Sanitation Facilities

	1985	(Per cent as on 31 March)		
		1990	1992*	
	1	2	3	4
Rural water supply	56.3	73.9	78.4	
Rural sanitation	0.7	2.4	2.7	
Urban water supply	72.9	83.8	84.9	
Urban sanitation	28.4	45.9	47.9	

* Provisional. Source: Eighth Plan, Vol.II.

9.52 The problems in sanitation, particularly in rural areas, are formidable. Only 2.7 per cent of the population in rural areas and 47.9 per cent in urban areas are estimated to have been covered with sanitation facilities by the end of March 1992. During the last seven years, i.e. April 1985 to March 1992, the coverage of rural population with rural water supply increased from 56.3 per cent to 78.4 per cent and in urban areas from 72.9 per cent to 84.9 per cent mainly due to efforts made during International Drinking Water Supply and Sanitation Decade (1981-1991).

9.53 The highest priority in the Eighth Plan is to ensure that the remaining no-source hard-core problem villages are provided with sustainable supply of drinking water by March 1993. Augmenting supply of water in all the partially covered villages is also considered to be equally important. Special attention would be given for coverage of SC/ST population and other poor/weaker sections. Priority will also be accorded to solve problems of quality of drinking water to achieve zero incidence of guineaworm disease by

1993 and total eradication by 1 April 1995 besides progressively finding solutions for other bacteriological and chemical problems like excess fluorides, salinity and iron in water sources. In the case of rural sanitation, the concept of 'Total Environmental Sanitation' would be followed. Information, Education and Communication (IEC) should form an integral part of rural sanitation programme. In all these efforts, emphasis would be on de-centralisation of functions, particularly operation and maintenance, with greater involvement of the community and the NGOs.

9.54 The Eighth Plan lays emphasis for elimination of manual scavenging as it is the most undignified work offered to the weakest section of the society. Its elimination will require (i) making provision of pour flush water-seal latrines mandatory in every house in urban areas and (ii) provision of alternative work opportunities to those engaged in it.

Labour and Labour Welfare

9.55 Expansion of employment opportunities is the central objective of planning. An accelerated expansion of employment opportunities and augmentation of existing employment in terms of income and productivity are necessary both for poverty alleviation and effective utilisation of human resources for economic and social development. During the last two decades, employment has grown at an average rate of 2.2 per cent per annum while the labour force has grown faster at about 2.5 per cent per annum and as a result the backlog of unemployment has been rising. The Eighth Plan has accorded priority for generation of adequate employment to attain a near-full employment situation by the turn of the century. Provisional estimates of employment in organised public and private sectors is given in Table 9.12.

**TABLE 9.12
Employment in the Organised Public and Private Sectors***

Sectors 1	1990			(As on 31 March) 1991		
	Males 2	Females 3	Total 4	Males 5	Females 6	Total 7
(Lakh)						
Public sector	164.88	22.41	187.29	166.22	23.43	189.65
Private sector	62.01	13.89	75.90	64.06	14.48	78.54
Total	226.89	36.30	263.19	230.28	37.91	268.19
(Per cent)						
Public sector	88.03	11.97	100.00	87.65	12.35	100.00
Private sector	81.70	18.30	100.00	81.56	18.44	100.00
Total	86.21	13.79	100.00	85.86	14.14	100.00

* Provisional

N.B. (i) Excludes Sikkim, Arunachal Pradesh, Dadra and Nagar Haveli & Lakshadweep which are yet to be covered by programme.(ii) Includes(a) all establishments in the public sector and(b) non-agricultural private sector establishments employing 10 or more persons.

Employment Exchanges

9.56 The National Employment Service consisted of a network of 854 employment exchanges (as at the end of December 1991) for registration of job-seekers and their placement against vacancies notified by employers. The number of applicants on the live register of employment exchanges at the end of August 1992 was 371.2 lakh (provisional) as against 358.3 lakh at the end of August 1991 i.e., an increase of 3.6 per cent. The number of job-seekers on the live register of employment exchanges increased from 178.38 lakh at the end of 1981 to 262.70 lakh by the end of 1985 and to 371.20 lakh by the end of

August 1992. The number of job-seekers on the live register of employment exchanges does not, however, give a realistic estimate of unemployment and would need to be corrected for the following factors: (i) those who are employed but registered with the employment exchanges; (ii) those who are unemployed but not registered with the employment exchanges, (iii) multiple registration which is common though not permitted as a matter of policy and (IV) those persons who are presently registering with employment exchanges in advance. Information regarding educated job-seekers (Matric and above) available up to the end of December 1990 shows that 61 per cent of the 346.3 lakh job-seekers on the live register of employment exchanges at the end of December 1990 were educated. The break-up of educated job seekers at the end of December, 1990 by level of education is shown in Table 9.13.

**TABLE 9.13
Job-Seekers(Matric and above) on the Live
Register of Employment Exchanges**

Educational Level 1	Males 2	Females 3	(As on 31 December 1990)	
			Total 4	Proportion of females 5
1. Matriculates	9778.9	(Thousand) 2548.8	12327.7	(Per cent) 20.7
2. Above matriculation but below degree	4121.0	1035.4	5156.4	20.1
3. Graduates/post graduates				
(a) Arts	1114.7	452.3	1567.0	28.9
(b) Science	551.7	177.8	729.5	24.4
(c) Commerce	557.8	98.8	656.6	15.0
(d) Education	213.5	196.4	409.9	47.9
(e) Engineering	84.0	11.6	95.6	12.1
(f) Medicine	22.8	8.9	31.7	28.1
(g) Others	112.6	19.9	132.5	15.0
Total (a to g)	2657.1	965.7	3622.8	26.7
Grand Total (1+2+3)	16557.0	4549.9	21106.9	21.6

Source: Ministry of Labour, DGE & T.

Matriculates and above but below graduate degree constituted 82.8 per cent of the educated job-seekers and the remaining 17.2 per cent were graduates and above. About 21.6 per cent of educated job-seekers were females.

Vocational Training

9.57 The strategy for quantitative and qualitative enhancement of employment opportunities has crucial elements like improvement in the quality of labour, productivity, skills, working conditions, provision of welfare and social security measures, specially of those working in the unorganised sector. There are a large number of skill development schemes for improving employability and productivity of the labour force and ensuring a regular supply of skilled man-power at different levels. Craftsmen's Training and Apprenticeship Training are two major programmes of skill development. At present 2447 Industrial Training Institutes (ITIs) with a total capacity of about 3.89 lakh seats run courses in 40 engineering and 22 non-engineering trades in accordance with standards set by the National Council of Vocational Training (NCVT). Out of these, 154 ITIs and 129 Women's wings in other ITIs cater exclusively to the vocational training needs of women. The ITIs' infrastructure is also utilised for the TRYSEM Programme. Further, ITIs in certain States/UTs such as Haryana, Himachal Pradesh and Delhi conduct non-formal

short-term courses. A network of Advanced Training Institutions provides advanced level training in different fields to workers employed in industry for upgrading their skills. Practical training at the shop floor is provided under the Apprentice Act, 1961 in 128 trades in 218 industries to engineering graduates and diploma holders (graduate and technician apprentices) in 76 fields of engineering and technology and also to those passing out of the vocational stream of the 10+2 system of education. A World Bank-assisted Vocational Training Project to modernise and update the Craftsmen and Apprenticeship training has also been taken up.

Labour Welfare and Social Security

9.58 The bonded labour system has been abolished with the passing of the Bonded Labour System (Abolition) Act, 1976. The Act envisages release of all the bonded labourers from bondage and simultaneous liquidation of their debts. According to the latest reports received from the State Governments, the total number of bonded labourers identified and freed as on 31 March 1992 was 250289 out of whom 223141 have been rehabilitated. The State Governments also reported that 13557 bonded labourers were not available for rehabilitation, thus leaving a balance of 13591 bonded labourers to be rehabilitated. A target for the rehabilitation of 2317 bonded labourers was fixed for 8 States during the current year. Upto the end of September 1992, 181 bonded labourers were reported rehabilitated by the State governments.

9.59 A number of legislative measures have been taken for the protection of working women and children. The Equal Remuneration Act, 1976 provides for payment of equal remuneration to men and women workers for the same work or work of a similar nature and for the prevention of discrimination against women not only in the matter of recruitment but also in relation to conditions of service in employment. The Child Labour (Prohibition & Regulation) Act, 1986 prohibits child labour in the employments hazardous to children and regulates employment of children in non-hazardous occupations. A National Child Labour Policy formulated in 1987 envisages inter alia a project-based plan of actions aimed at rehabilitation of children withdrawn from employment through provision of welfare inputs, like non-formal education, vocational training, health care and nutrition. Nine National Child Labour projects have so far been set up in areas of concentration of child labour. Special schools form a major component of the project through which welfare inputs are provided to such children. 125 schools covering 6900 children have so far been set up. Besides, financial assistance is given to voluntary organisations for taking up action-oriented projects for the welfare of working children. In a centrally sponsored scheme, assistance to the extent of 50 per cent of salaries of specific additional staff for enforcement of laws relating to women and child labour in selected areas is available to State governments. In order to improve the database and coordinate efforts for training, awareness generation etc., a Child Labour Cell has also been set up in the National Labour Institute with the assistance of UNICEF. A new programme entitled the International Programme for Elimination of Child Labour has also been launched under the aegis of ILO.

9.60 Social security to workers is provided through a number of legislative measures. These provide for payments of compensation to workmen in case of industrial accidents and occupational diseases leading to disablement or death, health insurance, provident fund, family pension, deposit linked insurance and payment of gratuity on termination of employment, superannuation, retirement, resignation, death or disablement to workers coming within their purview.

Special Employment Programmes

9.61 A number of special employment programmes for self and wage employment are being implemented in rural and urban areas. These include Integrated Rural Development Programme (IRDP), Training of Rural Youth for Self Employment (TRYSEM),

Development of Women and Children in Rural Areas (DWCRA), Jawahar Rozgar Yojana (JRY), Nehru Rozgar Yojana (NRY) and the Scheme for Self Employment to the Educated Unemployed Youth (SEEU). Special employment programmes are also being implemented by some of the State Governments like the Maharashtra Employment Guarantee Scheme (EGS) and the Self Employment Scheme for Registered Unemployed (SESRU) by the Government of West Bengal.

9.62 The Integrated Rural Development Programme (IRDP) seeks to promote self-employment by providing productive assets and inputs to the rural poor through a mix of subsidy and bank credit. Training of Rural Youth for Self Employment (TRYSEM) and Development of Women and Children in Rural Areas (DWCRA) are two special sub-schemes of the IRDP. TRYSEM provides training and skill development opportunities to poor rural youth to enable them to take up self-employment or wage employment and DWCRA seeks to promote economic activities among groups of poor rural women. During the current year another sub-scheme of IRDP for supply of improved tool kits to rural artisans has been introduced in 58 districts of 29 States /UTs for assisting 95450 rural artisans. Jawahar Rozgar Yojana (JRY), started during 1989-90, is designed to generate additional short-term gainful employment for the rural unemployed and underemployed on works which create productive economic assets in the rural areas. These works are largely planned and implemented at the village level. Achievements in respect of these special employment programmes being implemented in rural areas since 1991 are indicated in the Table 9.14.

TABLE 9.14
Achievements of Special Employment Programmes in Rural Areas

Source: Ministry of Rural Development.

9.63 The Nehru Rozgar Yojana (NRY) was launched in October 1989 for the benefit of the urban poor. The scheme was re-designated subsequently and it now consists of three sub-schemes, namely the Scheme of Urban Micro Enterprises (SUME) which seeks to provide support to the urban poor in upgrading their skills and setting up micro-enterprises in all urban settlements along the lines of IRDP, the Scheme of Urban Wage Employment (SUWE) for providing wage employment through provision of basic amenities to the poor in all urban settlements with a population of less than one lakh and the Scheme of Housing and Shelter Upgradation (SHASU) for providing employment through housing and shelter upgradation in urban settlements with population between one and 20 lakh with relaxation in the lower population limit in certain specified locations. The Self-Employment Programme for Urban Poor (SEPUP), which was launched in September 1986, has been merged with SUME of NRY from 1992-93. The achievements under Nehru Rozgar Yojana are given in the Table 9.15.

TABLE 9.15.
Achievements under Nehru Rozgar Yojana

(iii) Persons Trained/trainees under SUME & SHASU	0.48	0.30	0.14	0.29	

@ Up to November 1992.

Source: Ministry of Urban Development.

9.64 The Scheme for Self Employment for Educated Unemployed Youth (SEEUY) was launched in 1983-84 for promoting self-employment through a mix of subsidy and bank credit among educated youth (aged 18-35 years) belonging to families with income not exceeding Rs.10000 per annum. It covers areas other than cities with a population of more than one million. The Central Government provides capital subsidy of 25 per cent under the scheme. During 1983-92, about 1.52 million beneficiaries had been sanctioned loans amounting to Rs.3004 crore. During the period 1991-92, about 93000 beneficiaries were sanctioned loans amounting to about Rs.200 crore. The target for 1992-93 is to assist one lakh beneficiaries under the scheme.

Outlook

9.65 A number of social sector programmes are under implementation for the development of human resources, for promoting welfare of weaker sections and for creating employment opportunities, especially for the underprivileged. The special employment generation and poverty alleviation programmes have helped the poor, and investments in social sectors have resulted in a significant improvement in the living conditions of the people on an average. The process of development has, over the years, resulted in a significant reduction in the incidence of absolute poverty. But poverty still remains a problem of considerable magnitude. Considerable disparities exist across States, between urban and rural areas, between males and females, and between those working in the organised and unorganised sectors. There is a need for further strengthening of special employment and anti-poverty programmes in terms of enhanced financial allocations, better targeting and use of more cost-efficient methods of implementation.

@ Relates to the calendar year 1950.

\$ Relates to 1951-52.

Quick estimates.

* Figures for the period up to 1980-81 derived by converting the indices on earlier bases into base 1980-81=100.

** Includes beds in hospitals, dispensaries, P.H.Cs, clinics, sanatoriums, etc.

@@ Figures for the period up to 1988-89 derived by converting indices on earlier bases into base 1982=100.

RE Revised estimates.

.. Not available.

P Provisional.

Notes:

1. As on March 1, 1951 and so on as per Census of India. Figures for the period 1985 to 1990 are based on projections of the Standing Committee of Experts on Population Projections, and for 1992 based on same assumptions as adopted by the standing committee in light of 1991 Census results.
2. Data for 1950-51, 1960-61, relate to period 1941-51, 1951-61, Census estimates. Data 1970-71 onwards are S.R.R. estimates for calendar year 1971 and so on.
3. Data for 1950-51, 1960-61, 1970-71, 1980-81 and 1984-85 relate to periods 1941-51, 1951-61, 1961-71 and 1981-86 respectively. Data for 1991 is based on the Age Specific Death Rates averaged over 1981-88 as estimated by Sample Registration System.
4. Data for 1950-51, 1960-61, 1970-71, 1980-81 & 1990-91 relate to years 1951, 1961, 1971, 1981 & 1991 respectively.
The figures for 1950-51, 1960-61 & 1970-71 relate to population aged 5 years & above whereas those for 1980-81 and 1990-91 relate to population aged 7 years and above.
5. All India literacy rate for 1991 excludes J&K.
6. Relates to calendar year; i.e. 1950-51 pertains to December 1951 and so on.

* Provisional.

** Net availability = Col. (3+4-5)

Neg. Negligible.

Notes : 1. Mid-year population figures from 1971 to 1980 are based on projections made by the office of the Registrar General of India. Estimates from 1981 onwards are provisional and are worked out by taking 1991 Census provisional population figures.

2. Production figures relate to the agricultural year July-June: 1951 figures correspond to the production of 1950-51 and so on for subsequent years.

3. Net production has been taken as 87.5% of the gross production, 12.5% being provided for seeds, feed requirements and waste.

4. Figures in respect of change in stocks with traders and producers are not known. The estimates of net availability above should not, therefore, be taken to be strictly equivalent to consumption.

5. The figures of net imports from 1981 onwards are based on imports and exports on Government of India account only.

P Provisional.

NA Not available.

@ Includes groundnut oil, rapeseed and mustard oil, sesamum oil, nigerseed oil, soyabean oil and sunflower oil but excludes oils for manufacture of vanaspati.

@@ Data relate to calender year: figures for 1955 are shown against 1955-56 and so on. Figures for blended/mixed fabrics were not separately available prior to 1969. These have been included under man-made fibre fabrics after 1969.

* Figures up to 1971-72 relate to coffee season and are thereafter on calender year basis. The figures for 1972-73 correspond to 1973 and so on.

** From 1967-68 onwards sugar season from October to September.

£ Relates to 1956.

+ Relates to actual releases for domestic consumption.

\$ Relates to financial year.

\$\$ Relates to calender year.

* Provisional.

@ Includes output in railway workshops.

+ Excludes hosiery, textile testing instruments and spares / accessories.

£ Includes buses, trucks and tempos, 3 & 4 wheelers.

** Relates to sugar season which is October-September.

*** Relates to utilities.

Neg. Negligible.

- Not available.

\$ On a calendar year basis.

\$\$ Relates to calendar year 1951.

++ Relates to November-October.

2.2 BUDGETARY TRANSACTIONS OF THE CENTRAL AND STATE GOVERNMENTS AND UNION TERRITORIES (CONTD.)
(Including internal and extra-budgetary resources of public sector undertakings for their plans)

Notes:

- (a) Includes plan expenditure of Railways, P&T and non-departmental commercial undertakings financed out of their internal and extrabudgetary resources, including market borrowings and term loans from financial institutions to State Government public enterprises. Also includes developmental loans given by the Central and State Government to non-departmental undertakings, local bodies and other parties. However, it excludes a notional amount of Rs.45 crore in 1980-81, Rs.461 crore in 1984-85, and Rs.97 crore in 1985-86 on account of conversion of loan capital given to non-departmental commercial undertakings into equity capital.
- (b) Includes general administration, pensions and ex-gratia payments to former rulers, famine relief (only non-plan portion), subsidies on food and controlled cloth, grants and loans to foreign countries and loans for non-developmental purpose to other parties, but excludes Contingency Fund transactions. It also excludes notional transactions in respect of subscriptions to International Monetary Fund of Rs. 559 crore in 1980-81, Rs.520 crore in 1985-86, Rs.1134 crore in 1986-87, Rs.1029 crore in 1987-88, Rs.775 crore in 1988-89, Rs.803 crore in 1989-90, Rs.550 crore in 1990-91, Rs. 1805 crore in 1991-92 (RE) and Rs. 7567 crore in 1992-93 (BE).
- (c) Includes internal resources of Railways, Posts and Telegraphs and non-departmental commercial undertakings for the plan.
- (d) Includes market borrowings of State Government public enterprises.
- (e) Excludes the notional receipts on account of repayments of loans by non-departmental commercial undertakings due to their conversion into equity capital. It also excludes notional transactions in respect of International Monetary Fund and Contingency Fund transactions.

** Provision for Special Employment Scheme is also included.

@ Includes National Informatics Centre.

\$ Excludes National Informatics Centre.

Notes:

1. As per revised budget classification.
2. Figures in brackets are inclusive of expenditure on works financed by central assistance for relief against natural calamities (Rs. 361.2 crore in 1985-86, Rs. 556.1 crore in 1986-87, Rs. 1113.6 crore in 1987-88, Rs. 575.0 crore in 1988-89 and Rs. 100.0 crore in 1989-90).
3. Annual Plan outlays/expenditure in respect of some erstwhile Union Territories have been included in State Plans' figures consequent on their attainment of Statehood. The Seventh Plan outlays are, however, as per the then existing situation.
4. Actual plan expenditure from 1985-86 to 1988-89 inclusive are as published in the previous Annual Plan documents.
5. Totals may not add up because of rounding.
6. Outlay/expenditure for petrochemical and engineering units under the Ministry of Petroleum and Natural Gas has been excluded from Energy and included under Industry and minerals.

@ Excludes, since the establishment of NABARD on July 12, 1982, its refinance to banks.

** Includes special securities.

\$ Includes Rs.751.64 crore (equivalent of SDR's 211.95 million) incurred on account of Reserve Asset subscription made to the IMF towards the quota increase.

Inclusive of appreciation in the value of gold following its revaluation close to international market price since October 17, 1990.

Such appreciation has a corresponding effect on RBI's net non-monetary liabilities.

Notes: 1. Data relate to March 31, Reserve Bank data are on the basis of closure of Government accounts.

2. Figures may not add up to totals because of rounding.

3. With the change in bank accounting year from calendar to financial in 1988-89, there were sharp and unusual increases in aggregate deposits and credit towards the end of financial year 1988-89 and 1989-90, followed by a large decline in them in the first week of next financial year.

All commercial banks	8262	55410	57698	59388	60190	60649	52387	32638	62

* Rural centres - Places with a population below 10,000.

** The reduction in the number of offices of the non-scheduled banks is due to:

- (i) the inclusion of some of them in the second schedule to the Reserve Bank of India Act, 1934; and
- (ii) take-over of certain non-scheduled banks by the State Bank of India and other scheduled banks.

N.A. Not Available.

.. Nil.

Note: The increase in the number of offices in rural centres represents the difference between the number of offices at such centres as on June 30, 1969 (classified on the basis of 1961 Census) and the number of offices at rural centres as on June 30, 1992 (classified on the basis of 1981 Census).

* The new series of CPI for industrial workers with 1982 base has been introduced from October, 1988. The earlier series on base 1960=100 has been simultaneously discontinued. The conversion factor from the new to the old series is 4.93 in regard to the General index, and 4.98 in regard to the Food index.

** The new series of CPI for urban non-manual employees with 1984-85 base was introduced from November, 1987. The earlier series on base 1960=100 has been simultaneously discontinued. The conversion factor from the new to the old series is 5.32.

Note : Annual figures are monthly averages.

- * Drawals of Rs.3402.4 crore under stand-by arrangement.
- P Provisional.
- @ Excludes Rs. 544.53 crore drawn under Trust Fund.
- @@ Drawals under Extended Fund Facility (EFF).
- & Drawals of Rs.1883.6 crore under Compensatory and Contingency Financing Facility and Rs.1450.2 crore under First Credit Tranche of Stand-by Arrangement.
- && Drawals of Rs 2217.2 crore under Compensatory and Contingency Financing Facility and Rs 987.5 crore under First Credit Tranche of Stand-by Arrangement.
- \$ Includes voluntary repurchases of Rupees (Rs.199 crore) and sales of Rupees by the IMF under its General Resources Account (Rs.35.2 crore).
- \$\$ Sales of Rupees by the Fund.
- # Additionally, SDR 59.9 million in May 1979, SDR 7.3 million in July 1980 and SDR 34.5 million in March 1982 were used for voluntary repurchases of Rupees.
- (A) SDR 66.50 million were used for repurchases of drawals under Compensatory Financing Facility.
- (B) SDR 33.25 million and Rs. 117.85 crore in foreign currencies were used for repurchases of drawals under CFF.
- (C) SDR 66.5 million and SDRs 131.25 million were used for repurchases of drawals under CFF and EFF, respectively.
- (D) SDR 431.25 million were used for repurchases of drawals under EFF.
- (E) SDR 704.17 million were used for repurchases of drawals under EFF.
- (F) SDR 804.18 million were used for repurchases of drawals under EFF.
- (G) SDR 681.25 million were used for repurchases of drawals under EFF.
- (H) SDR 468.75 million were used for repurchases of drawals under EFF.
- (I) SDR 337.49 million were used for repurchases of drawals under EFF.
- (J) SDR 179.16 million were used for repurchases of drawals under EFF during April-December1992-93.

- Notes :
1. Figures after 1965-66 are not comparable with those of the earlier years owing to devaluation of the Rupee in June 1966.
 2. Also figures for July 1991 onwards are not comparable with those of earlier periods due to the downward adjustment of the Rupee effected on July 1&3,1991.
 3. Drawals, Repurchase and outstanding repurchase obligations are calculated at the ruling rates of exchange.
 4. Gold is valued at Rs. 53.58 per 10 grams up to May 1966 and at Rs. 84.39 per 10 grams up to September 1990 and closer to international market price w.e.f. October 17,1990.
 5. Foreign exchange includes (a) foreign assets of the Reserve Bank of India and (b) Government balances held abroad up to 1955-56.

6.2 BALANCE OF PAYMENTS (CONTD.)

-
- ** Includes loan of Rs.544.5 crore from the IMF Trust Fund.
① Includes rupee loans under PL-480 Title-I. Figures from 1980-81 onwards are preliminary.

Notes:

1. Figures given in this table for some items of capital account do not correspond to similar statistics published by Reserve Bank of India. The difference is due to adjustments made in respect of loan drawings under external assistance and repayment thereof. The presentation of balance of payments statistics in the above table differs from the adjusted balance of payments statistics published in the previous issues of the Economic Survey.
2. The Rupee equivalent of all foreign currency transactions has been arrived at by applying the par/central rates up to June 1972 and thereafter on the basis of the average of RBI's spot buying and selling rate for sterling and the monthly averages of cross-rates based on London market for non-sterling currencies.
3. Grants received are covered under item 5(a).
4. U.S. Embassy expenditures out of PL-480 counterpart funds are included under item 5(a).
5. Receipts by way of loans by the private sector including loans out of Cooley Fund and amortization payments thereof are excluded from items 7(a) (i) and 7(a) (ii) and included under item 10 and 7(c) respectively.
6. Receipts by way of loans received by the official sector under the External Assistance Programmes including Rupee loans out of PL-480 Title-I and corresponding amortization payments are excluded from item 7(b)(i) and 7(b)(ii) and are shown under items 10 and 7(c) respectively.
7. The movements in PL-480 Rupee balances are included under item 7(b).
8. Since October-December 1986, data on credits under private long term capital and official loans include borrowings made to prepay earlier loans; debits against private long-term capital and official amortization cover such prepayments.

NA Not available.

- Nil population.

Notes:

- The Census was not conducted in J&K in 1991. The figures for J&K are projected population for the year 1991.
The projected figures of SCs and STs for J&K are not available hence those have not been included in columns 7&8 of the statement for J&K as well as in all India.
